Area chart showing the contribution of individual mines to the extraction of metallic ores (up) and associated leftover rocks (below) in Finland during 2000–2017. In the chart, the mines have been arranged in the same order as in the legend. It is based on the amount of extraction of ore in 2017, which decreases upwards. Source: 2000–2010 Ministry of Employment and the Economy (MEE), 2011–2017 Finnish Safety and Chemicals Agency (Tukes).
